Assignment No : 1
PART 1: INTRODUCTION

Hello Everyone,

My name is Madhav Vijay Jadhav and I am born and brought up in Pune. I have Completed my 10th from Rosary High School which is located in Bibwewadi and Achieved 80% in my Results, I have Completed my Diploma in Computer Technology from Bharati Vidyapeeth's Jawaharlal Nehru Institute of Technology(Polytechnic) and Achieved 95.37%. Currently I am pursuing my BE degree in Engineering from Pune Institute of Computer Technology, Pune (Commonly Known As PICT).

My Hobbies include Playing Video Games, Watching Anime, Video Editing, Coding, and Recently I have started to learning Skills related to Game Development as I always wanted to be a game developer, so I want to be a bit more serious about my Dream.

My Future plan is to become a Game Developer and to get a good job as a beginner cause you know we must have some experience on how the Internal/External working of a Company takes place, later I might plan to start my own Game Development Company.

I always Dreamed of becoming a Game Developer because I have been playing Games ever since I was a little kid who did not know how to switch ON a Computer without his parents help, So I decided to look for a career where I can be connected to Games as you know you should look for a job that interests you and Hence I decided to become a Game Developer.

PART 2 : SWOC ANALYSIS

SHORT TERM GOAL : To learn Basics of Game Development and to improve my Coding Skills.

STRENGTHS : My Strengths includes keeping the work Interest Alive i.e.. if you feel that a concept is Hard in understanding or Booring then skip it for some time and look for other concepts that are related to your work in this way you will not skip your work and continue learning, some people might relate it with Procrastination.

WEAKNESSES : Sometimes even though I am interested to do some work I skip it because of laziness. I get sleepy realy soon.

OPPORTUNITIES : Getting Admission in PICT is a great opportunity for me as getting admission in PICT is Dream for a lot of people and as we know only a few can get admission in PICT depending on the seat strength, PICT also has a strong coding culture because of which I feel that there are chances of me meeting others who share the same Dream as me.

CHALLENGES : Biggest challenge for me was getting admission in PICT as I was not the sharpest tool in the shed i.e.. I was not the brightest student in my previous College, but sometimes even GOD appreciates your hard work and here I am now in PICT.

Long Term Challenges : of course is to become a Great Game Developer and getting job in some of the Biggest Game Development Companies such as Rockstar, Ubisoft, etc.

LONG TERM GOAL : To become a top rated Game Developer and even might plan start my own Company.
